To       Electoral Commissioner  
          ISOC Ghana Chapter  
          Accra, Ghana.

Dear Electoral Commissioner,

**EXPRESSION OF INTEREST FOR THE POST OF ISOC GHANA CHAPTER PRESIDENT**

With reference to the advertisement on the website (<http://www.isoc.gh/>) on the ISOC Ghana Chapter Elections 2017, I write to express my interest in the post of the President of ISOC Ghana Chapter.

As the current IOSOC President, I joined AfNOG community in 2006 as a trainee. In 2009, I became a trainer in the Internet Scalable Services Track and since 2010 I have become the Computer Emergency Response Team (CERT) track leader of AfNOG. Also, since 2009, on the account of ISOC Bureau Afrique, I have been traveling to several English and French speaking African countries as a volunteer to facilitate the AfNOG Localization program.

After serving effectively and efficiently as the Chair of Education during the just ended term (2013-2014), I was promoted the Acting Vice President of ISOC Ghana Chapter from 2014 to 2015. I was also one of the founding members of ghNOG and was the first Technical Coordinator. I am the lead architect and engineer of the “University Caucus” program which is aimed at achieving the ISOC goal of “**The Internet is for everyone**”. University Caucus is a decentralized branch of ISOC on the various University campuses in Ghana. They depend on the main chapter and carry out some of the functions of the main chapter on the campuses such as the technical training. I am also the architect of Internet Engineering Task Force (IETF), Ghana Section. The purpose of IETF Ghana is to create the awareness on the role IETF plays in the development in Ghana and promote Ghanaians participation in its activities.

Plan to take ISOC to the Lawyers and the journalists through training that would enable them to carry out their job accurately as much as possible in line with the technical concept of the internet. Partnership with organization to promote among SME and SMI the use of the internet to do business.

Bringing on board my rich international experience coupled with my ability to creatively innovate, I believe that as the President of ISOC Ghana Chapter, I can take to the next level the agenda that will, nationally and internationally, lead to **“The Internet is for everyone”**.

Enclosure: My Curriculum Vitae.

Thank you,
